

I currently listen to K-Love radio in Canyon, Texas on 89.1. This is one of the only stations my family listens to and I do not want LPFM to take priority over K-Love. I know there is currently a LPFM station out of Amarillo, Texas that from time to time will cut in on K-Love and we have a hard time hearing K-Love on 89.1. This is very frustating considering K-Love is such a huge ministry to not only my community but to millions of people around the country. Please do not allow the LPFM stations to take priority over a station like K-Love. I truly believe that by allowing these Low Power Fm stations take priority over other fm stations the quality of our radio would go down. Please do not allow this to happen.
